MEMORANDUM

Date: May 16, 2019

To: Board of Directors – WTCPUA

From: Jennifer Riechers, Interim General Manager

Re: Billing Software Recommendation and Funding Plan

Staff researched, attended presentations/demos, visited neighboring utilities and obtained references regarding new billing software options from five software companies. While the various software companies are similar in functionality, one company stood out to staff due to their professionalism, functionality, integration, training and price competitiveness.

Staff recommends contracting with Tyler Technologies, Incode software with their cloud-based software options. Reasons for this recommendation are listed below:

Functionality:

Tyler has multiple modules that add support to the Utility Billing software module. The Utility Billing software will incorporate mobile service orders that provide real-time integration with an automated data sync, online account management that allows customers to have instant access to billing and account information, and automatic updates to accounts that will eliminate data entry duplication. Incode will have the capability to automate and integrate our wholesale and pretreatment program billing processes and save many hours of administrative time spent manually entering and processing monthly bills and payments.

Integration:

While we initially started the research on Utility Billing software, learning about Incode's fully compatible modules opened the discussion to fully integrate all aspects of the PUA's operations, billing, finance and work orders. Staff feels that transitioning to new software at one time would benefit the PUA by fully incorporating the setup and training in one event. This would automate all service areas and each department would be integrated so that everyone would have access to real time updates in the software system which will enhance the customer experience with accuracy and efficiency.

The following modules are recommended by staff for full integration:

Financial Module- We believe that the Financial Management module, which includes Fixed Assets, Project Accounting, Core Financials, Purchasing, Payroll/HR and an online document management system would be extremely beneficial to the functionality of the Agency. This software is widely used by governmental entities and has become an industry standard. As updates are made to the Utility Billing side (customer payments, monthly billing), updates are automatically made to the financial side. This integration will fully automate processes that are now done manually after each monthly district billing and will save many hours of staff time.

Work Orders Module- Including this module will allow a multi-year plan for preventive maintenance for Agency facilities and equipment to be put in place with fully integrated tracking of labor hours and material costs and maintenance histories.

Building Projects Module- This module will support the SER/construction plan process. It allows for customers to follow the process of their projects and will help digitally organize the internal SER program. Staff can see all projects online and click on project names to see all related documents regarding that project. Currently, the SER process is tracked by spreadsheets and there is no way for applicants to electronically check the status of their project. Billings associated with SER projects will be fully integrated with the Financial Module.

Training:

Tyler has included 632 hours of implementation time in their quote which includes many hours of end-user training both on-site and via web-based conferencing. They also provide access to Tyler University which is a comprehensive training resource for all modules, and online communities for learning best practices. This comprehensive coverage of training and user support was far superior to any other software company we researched.

Price:

A cost comparison schedule of total costs is attached for your detail review as well as the sales quotation from Tyler Technologies.

The cost for Tyler utility billing software is \$9,900 less than Logics utility billing software, which was another company for which we did in-depth research. A third quote was obtained from another provider that was almost identical to the Tyler software.

We analyzed the cost of adding the modules recommended above to the utility billing software for full integration and determined that the total annual fees are within \$2,300 of our current annual software costs.

Expected Funding Plan:

Total Implementation Costs					Funding Plan		
	One Time Fee	Annual Fees	Travel	Total	FY 2019 Adopted Budget	Rollover	FY 2020 Budget Funding Request
FY 2019	15,000	-	-	15,000	100,000	(85,000)	
FY 2020	99,050	75,158	15,000	189,208		85,000	104,208
	\$ 114,050	\$ 75,158	\$ 15,000	\$204,208	\$ 100,000	\$ -	\$ 104,208

Requested Board Action:

1. Authorize the Interim General Manager to execute a service agreement with Tyler Technologies to include the services listed on the attached sales quotation and related travel expenses in an amount not to exceed \$210,000.
2. Direct the Controller to move unused funds budgeted in FY 2019 to FY 2020 and to include the FY 2020 Budget Funding Request in the amount of \$104,208 in the FY 2020 budget.

Cost Comparison

-Tyler/Incode is \$9,900 less than Logics software for the utility billing software.

-After adding 5 new software functionalities (mobile service orders, fixed assets, project accounting, work orders & building projects), the Tyler/Incode annual fees are only \$2,300 higher than our current annual software costs which do not include any of the new functionalities.

		Tyler/Incode			Logics

Comments

This an Incode 10 and Sourcewell agreement.

- Utility CIS System includes collections, tax lien process and import, utility payment import, a standard forms pkg., output director and one Utility handheld meter-reader interface.
- Cashiering supports credit/debit cards via ETS, includes PCI Compliant, a cash collection interface, a cashiering receipt import)
- Incode Utility Billing Online Component displays the current status (late, cut off etc), the action needed to avoid penalty, current balance, deposits on file (optional), last payment date, last payment amount, payment arrangements on file, last bill amount, last bill date, bill due date, contracts on file and status, transaction history (online payments). Payment packet is created to be imported to utility system. Address information includes legal description, precinct, school district, and services at address(subject to data availability). Includes consumption history by service (including graphs), request for service (optional), information change request (optional), security -SSL (secure socket layer). Note that the customer pays \$1.25 fee per transaction for payment on-line.
- Notification for Utility Billing (\$0.10 per call) includes Customer notification by phone (call late notices and general notifications). Call lists are automatically generated and the account is updated after the call. It includes a custom message for each call type and the call message can be in English or Spanish. It generates reports based on call results. Note: The Utility will be billed at the rate specified above for all the calls made. The Utility will be billed quarterly by Tyler Technologies for calls conducted.
- Utility Billing conversions include contacts/properties/accounts, service meter info - meter inventory, transaction/consumption/read history (2 Years), metered services (1 metered service), non-metered service (up to 2 services). Additional fee for historical views.
- Incode IVR Solution for Utility Billing-The payment packet is created in centralized cash collections. The IVR system gives the customer an account balance, the customer makes the payment by phone, and the account manager is updated with the payment record. NOTE: There is a \$1.25 per transaction fee associated with the IVR that will be paid by client unless Tyler is instructed by the client to pass along to the user at time of payment.
- Travel Expenses are billed as incurred based on our current Business Travel Policy.
- Core Financials includes general ledger, budget prep, bank recon, AP, Express, CellSense, a standard forms pkg, output director, positive pay, secure signatures (qty 2).
- General Ledger conversions include Chart of Accounts - additional fee for historical views.
- Accounts Payable conversions include Vendor Master Only - additional fee for historical views.
- Personnel Management/Payroll conversions include employee master, deductions/taxes, retirement, current leave totals, current direct deposit - additional fee for historical views.
- Hosting User Fee includes 12 users. Hosting includes Basic Network Services and Disaster Recovery Services.

Serving Across Texas

Bosque and Hamilton Counties implemented more efficient and transparent financial processes using Incode Financial Management, with real-time information sharing, remote troubleshooting, and electronic filing systems that empower the user.

The City of Cedar Park reduced manual payment processes by 44% and gave customers the ability to make payments 24/7 by implementing Tyler's Incode Utility Billing Online Payment solutions to handle an increase in foot traffic.

The City of Seguin used Tyler's Incode Utility Billing Solution to reduce paperwork, issuing thousands of service orders electronically and freeing up staff time.

tyler
technologies

The City of Murphy saw a 23% increase in online business and saved 56 hours per month after choosing Tyler's Online Utility Account Management System to solve problems rising from surrounding population growth.

The City of Brenham saved over \$31,800 in labor costs and decreased manual postings from 7,700 to 3,800 after choosing to implement Tyler Output Processor and Online Bill Pay.

Why Us?

- We're committed to what we do
- We're professionals who have walked in your shoes
- We're people who understand your needs
- We know the public sector like no one else

The Public Sector is our one focus.

Incode 10 Software Feature

Overview

Make WTCPUA more efficient, accessible, and responsive to the needs of its customers with Tyler's Incode solution. Incode's modular design allows you to grow into our seamlessly integrated application with the addition of new programs as you find them necessary. All products in this proposal are designed and supported by Tyler or one of our partners, so you will never run into issues with compatibility.

Technology moves fast. As new tools and technologies become available, Tyler continually enhances our software suite. The latest generation of Incode software offered to you utilizes Microsoft's powerful .NET technology, allowing for a visually dramatic user experience, seamless and secure communication, and the ability to model a range of business processes. With the end-user in mind, we have included countless features to facilitate more efficient, personalized access to data. This extensive toolset can streamline day-to-day operations and make you more effective for your community.

Modular Integration

The Incode solution is an extensive collection of integrated applications categorized into different suites depending upon the needs of WTCPUA. Incode's modular design uses a single database for all applications, allowing you to purchase and implement specific applications without jeopardizing your ability to integrate new modules in the future. Even if you are unsure of your current needs, our experienced implementation staff can guide you in

best business practices to achieve a better workflow using our past experiences with clients like you.

Customizable Applications

Further personalize each Incode application to your needs with user-defined customization.

Application	Customization
System Files	From basic definitions, such as the record identifier, to more complex options like budget checking
Information Console	User-specific point of entry through Microsoft® Sharepoint to individual Incode applications and relevant data with the ability to view key performance indicators, summary data, and user-specific reports
Screens	Customizable colors, processes, and access contingent on role-based security
Tables	Records specific to each application that are accessible and validated during data entry
Fields	Custom data fields can be created in various Incode modules, allowing for multiple customization options.

Workflow and Workspace Management

Automate, simplify, and direct workflow in WTCPUA using features from Incode's customizable workspace functionalities:

- Multiple Windows and Dual Monitor Use
- Customizable Widgets and Shortcuts
- Pre-defined Templates
- Workflow Metrics and Key Performance Indicators
- Automatically Updated Data
- Role-Specific Processes

- Internal Notification and Messaging
- Integration with Microsoft® Outlook
- Audit Footprints

Audit Trail Features

Keep detailed track of transactions and updates with the Incode solution's auditing features:

- Create audit footprints with user ID for each processing step
- Record dates, amount names and numbers, transaction amounts, descriptions, and references
- Query audits in a central console
- Use search filters on queries
- Access record details with one click

Report Services

Incode software includes standard reporting and analysis tools, as well as an integrated Report Writer for ad-hoc report writing, report modification, and unique report design. Preview reports and explore related data using custom display parameters, layouts, and formats. Schedule reports to run at chosen times, automatically deliver reports to designated personnel, export reports to a variety of file formats, or print reports at any time.

E-Government Capabilities

Keep a positive relationship with the customers of WTCPUA using Incode's web solutions. Promote transparency and public access and streamline the upload of payment with the web-integration of Incode applications supported through InSite.

Security Features

Use a variety of security options with Incode software:

Security Option Function

Form Based	The user must specify login credentials each time the software is executed
Domain Based	User information is pulled from Windows Domain and checked against database
Mixed Mode	User information is first pulled from the Windows Domain and checked; if credentials fail, the use can enter credentials by hand
Active Directory	User information is pulled from Windows Domain and queried against the Active Directory structure
Single Machine	A single machine can be excluded from or set exclusively to one of the above modes

Our security features offer you peace of mind by providing:

- Permission assignment to individual applications and internal programs
- Support for both individual and group permissions
- Program execution tracking
- Logs of information such as date, time, user, program name, and system message

Service and Support

Access next-level service and support for all your Tyler products, learning more the programs that improve your workflow and quickly resolving any issues you encounter.

Customer Support

To resolve support issues promptly, Incode offers customers many different choices for contacting support personnel:

- Email Support
- Live Internet Support
- Live Telephone Support

Live support means a more expeditious resolution for you, helping you efficiently manage your time.

Customer Education

Learn more about our materials and processes through a variety of venues:

- On-Site Training
- Regional Training
- Web-Based Seminars
- Online Self-Study Courses
- Annual Education Forums

At annual education forums, choose between diverse classes out of a structured schedule, with topics tailored to your needs at work, potentially earning Continuing Professional Education credits.

Quality Assurance

We incorporate an extensive Quality Assurance when we develop our software. Members of the Incode Quality Assurance team specialize in specific areas of the product line, testing each component of a new application and ensuring it seamlessly integrates with other Incode applications. Furthermore, each new release of Incode software undergoes extensive Beta testing in the field at different customer sites.

Core Financials

General Ledger

Maintain comprehensive and flexible control of financial transactions in WTCPUA with the Incode General Ledger. Cut down on time spent in data entry by automating routine functions, and instantly review and report relevant financial information.

Report Functionality

Securely review and report any financial information using powerful financial management tools at the individual account level.

Create Reports

- Use pre-defined templates
- Create tailored financial statements using the integrated Financial Statement Designer
- Group accounts together to provide quick selection when generating reports

Manage Reports

- Schedule reports to be delivered to users at a specific date/time
- Export results to other data formats
- Quickly view account budgets
- Use search grids with printing and exporting capabilities

- Capture pertinent information with the notes and document attachment features
- Easily extract financial information into existing Microsoft® Excel spreadsheets

Secure Reports

- Control user access at the account and budget level
- Use secure add/edit functionality from anywhere in the system
- Maintain a complete audit trail
- View transactional footprints and audit logs

Transaction Functions

- Add accounts en masse
- Configure account structures by type
- Calculate and track multiple allocation methods without a separate spreadsheet
- Automatically create interfund balancing entries for posted transactions across multiple funds
- Open concurrent fiscal years to accommodate the entity's audit schedule
- Automate the fiscal year-end closing process

Integrations

- Financial
- Personnel
- Cashiering
- Utility Billing
- Customer Relationship Management
- Court

Budget Manager

Create and review budget information for all accounts and departments in a simple, secure interface. Use the Budget Manager to organize and maintain the budget for WTCPUA.

Report Functionality

Consolidate budget prep and analysis functions in one place with customized access restrictions and audit trails to all changes to the status, amount, or description of any item. Quickly install adopted budgets and maintain ODBC interface compliance with the Budget Manager's report functionality

Create Budgets

- Calculate projections based on other budgets or year-to-date balances with custom multipliers and filters on cost centers and account segments
- Access all revenue and expenditure line items, including line items for future budget periods
- Report budget projections with custom financial statement formats
- Import personnel budgets from the HR Position Control Budgeting module
- Export and import budgets with Microsoft® Excel

View Budgets

- Sort budget information by fund, department, type, or accounts
- Create budget notes at the line item, department, and fund level
- Edit budget information at the individual account level
- Group line items for budget control
- View supporting details, notes, and distribution of dollars from budget worksheet views
- Calculate projections based on other budgets or year-to-date balances with custom multipliers and filters on cost centers and account segments
- Automatically distribute customized budget amounts

Bank Reconciliation

Tyler's Incode Bank Reconciliation software is an interactive module that reconciles monthly bank statements to general ledger cash accounts.

Efficiently produce reports, track and compare items automatically, and easily look up reports for comparison.

Easily Reconcile and Track Transactions

Automate month-end reconciliation processes and recognize bank deposit, services charge, interest income, and returned and cleared check postings with efficient reconciliation and tracking services.

Efficient Reconciliation

- Reconcile monthly bank statements to general ledger cash accounts
- Use default clearing dates to speed up the reconciliation process
- Clear outstanding transactions individually or in groups
- Use multiple bank accounts
- Consolidate the reconciliation process to maintain a single bank account with multiple secondary cash accounts in various funds
- Process an unlimited number of cash accounts per fund
- Easily accept transaction adjustments
- Produce Bank Transaction Reports using different filters

Reconciliation Tracking

- Automatically track the beginning date of the next bank statement
- Track the originating system, account number, footprint details, and change history of an item
- Use notes feature to capture important information on Bank Accounts and Statements
- Indicate voided checks on the reconciliation register
- Easily compare monthly reconciliation statements reflecting balance summary and period activity for both bank account and general ledger
- Use search grids with printing and exporting capabilities
- Use quick item-lookup features such as amount range, type, and status

Integrations

- General Ledger
- Accounts Payable
- Payroll
- Fixed Assets
- Utility Billing
- Cashiering

Accounts Payable

Monitor cash flow, reduce data entry duplication, manage vendors, process invoices, and maintain audit trails with Incode's Accounts Payable software module.

Manage Vendors

Use the multiple vendor features to search by vendor name, vendor number or DBA name, maintain multiple addresses, and set payment terms, along with other management functions.

- Manage and inquire key vendor information
- Add unlimited user-defined fields at the vendor level to meet your information tracking needs
- Change the status of multiple vendors at one time based on last activity date
- Create vendor payables based on a defined schedule or template
- Add or edit GL accounts and vendors during payable processing
- Query, view, and print comprehensive vendor transaction history in dynamic, configurable grids
- Display outstanding purchase orders for a vendor during payable entry

Manage Payments

The flexibility of the software allows users to accept, search, and manage multiple kinds of payments.

- Control the payment process and cash requirements
- Use multiple payment methods, over-budget checking, and docket/claim numbering
- View the Open Payable Report to view and filter through user-specified funds
- Write checks from separate funds, a disbursement fund, or a pooled cash fund
- Expense items to a virtually unlimited number of accounts and funds
- Produce registers and audit reports for a complete audit trail
- Track sales and use taxes

Manage Data

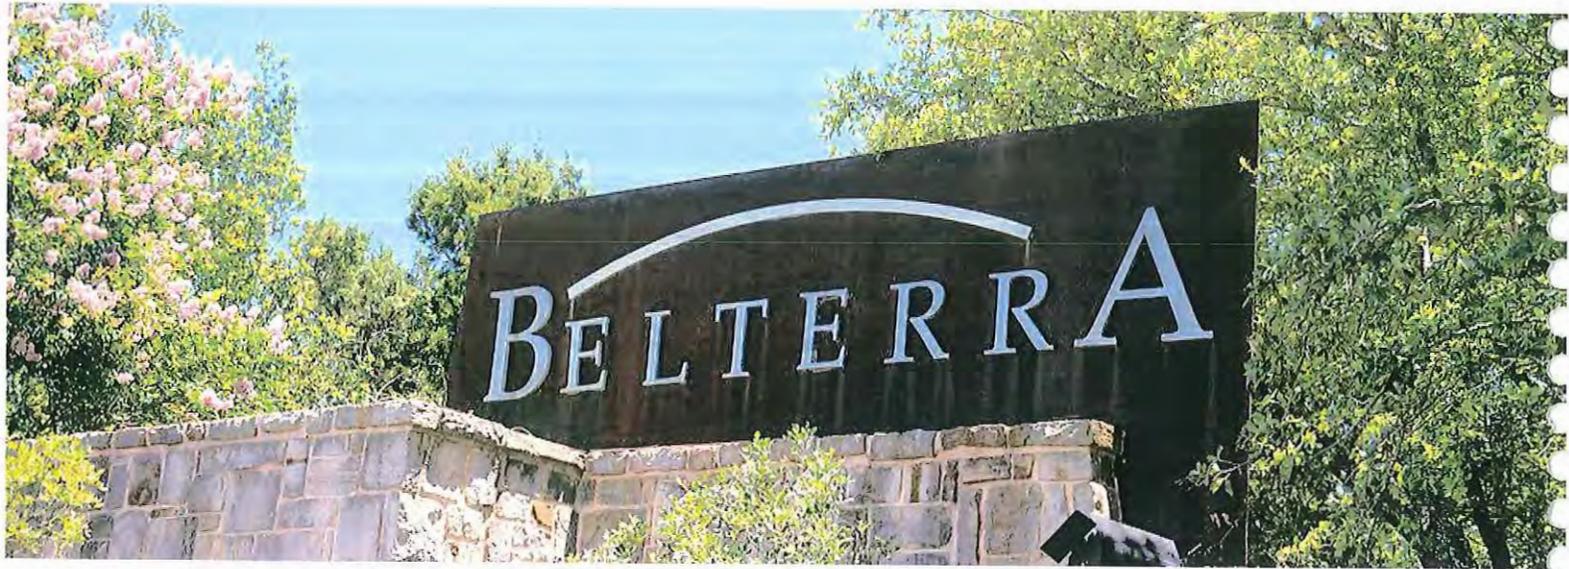

Manage and view a comprehensive, clear transaction history, with easy electronic filing, audit trail maintenance, and other tools for a paperless office.

- Prevent duplicate payable numbers
- Write checks on demand
- Select automatic payments by vendor, due date, or manual payment selection
- Export report results to other data formats
- Import payables via flat/text file
- Go paperless with integrated Document Management
- Produce electronic files for federal and state reporting
- Manage and track 1099-MISC and 1099-S reportable transactions
- Print 1099 and 1096 forms
- Use a variety of reporting options

Integrations

- General Ledger
- Purchase Orders
- Payroll
- Bank Reconciliation
- Fixed Assets
- Project Accounting

- Work Orders
- Business License
- Building Projects
- Sales Tax
- Special Assessments

Personnel Management

Employee Self Service

Tyler's integrated Incode Employee Self Service (ESS) offers WTCPUA a robust time-entry solution directly through a web application.

User Controls

Automatically calculate FLSA-based overtime for periods of up to 28 days, allow individual employees or assigned delegates to enter time, and review and approve employee status and individual/group times with a group approval screen using our ESS application.

Personalized Employee Abilities

- View or update personal information
- Check announcements and view leave, paycheck, and position history

Online Administrator Abilities

- Add/edit/delete announcements and user
- Configure online display options

Integrations

- Incode Personnel Management

Personnel Management

Adaptable user controls and tracking, efficient report production, customizable security measures, easy FLSA and FMLA compliance requirement monitoring, user-defined checklist, and flexibility for unique cases make Incode Personnel Management an easy choice for the Human Resources in WTCPUA. Our software gives you all the attributes of a feature-rich Payroll application and a comprehensive Human Resources software.

Manage Efficiently

Tools are available that allow users to query and manage information at the employee level including personal data, position history, pay details, leave balances, FMLA events, equipment, worker's compensation events, training, education, certification, and reviews.

Employee Management

- Query and manage employee-level information
- Assign specific requirements, manage personnel, and develop budgets by position
- Develop multiple budgets for various potential scenarios
- Create adjustable default benefit plans
- Track information about employee dependents
- Allow employees to use Direct Deposit capabilities and leave-tracking features
- Easily identify important dates on employee records using alerts
- Schedule employees by groups for training, testing or reviews
- Add user-specific security restrictions and apply department-level permissions
- Write emergency checks and use an automated check reversal process

Report Management

- Produce monthly, quarterly, and year-end reports as required
- Maintain employees' personal information

- Automatically track employee completion of certification and training
- Manage accident and injury claims covered by workers' compensation
- Report employer liability for accrued benefits at fiscal year end
- Process entities with separate taxpayer ID numbers using multiple payroll sets
- Limit viewing of Social Security numbers by security code
- Print custom payroll forms and letters from Microsoft® Word templates
- Print overlaid 941 forms

Integrations

- Distributed Time Entry
- Time Clock Interface

Tyler Content Manager, Standard Edition

Reduce printing, automate image capture, use pre-configured documents, and access secure archives from within the Tyler Content Manager, Standard Edition (TCM SE). Streamline your workflow and save WTCPUA money in the process.

Protect and Manage Documents

With TCM SE, all documents are linked together through one solution. Users can view and work with multiple document types across your organization, in multiple business scenarios. Go fiscally and environmentally friendly by becoming paperless, eliminate misfiled documents and lost papers, and easily access and maintain your documents with the TCM SE program.

Document Storage

- Automatically capture forms and reports
- Scan and process invoices in batches

- Create, print, and automatically archive Incode Mail Merge documents
- Annotate documents and link to reports submitted during scheduled job execution

Custom Security

- Respond to audit information requests, subpoenas, and other mandatory requirements
- Link documents together to be viewed by authorized personnel with one solution
- Customize system to conform with to Records Management requirements
- Maintain audit trail and document backups

Document Search

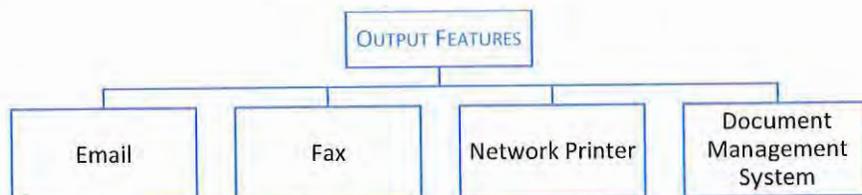

- Create and access keyword search features and custom criteria
- Quickly index and search text with Optical Character Recognition
- Support simultaneous active users searching and retrieving
- Give employees, vendors, and customers access to self-service

Integrations

- Incode Mail Merge
- TCM Self Service (Optional)
- TCM Disaster Recovery Services (Optional)

Tyler Output Processor

Choose how to handle document output and saving. Email, fax, or keep hard copies, or choose to automatically capture and index images.

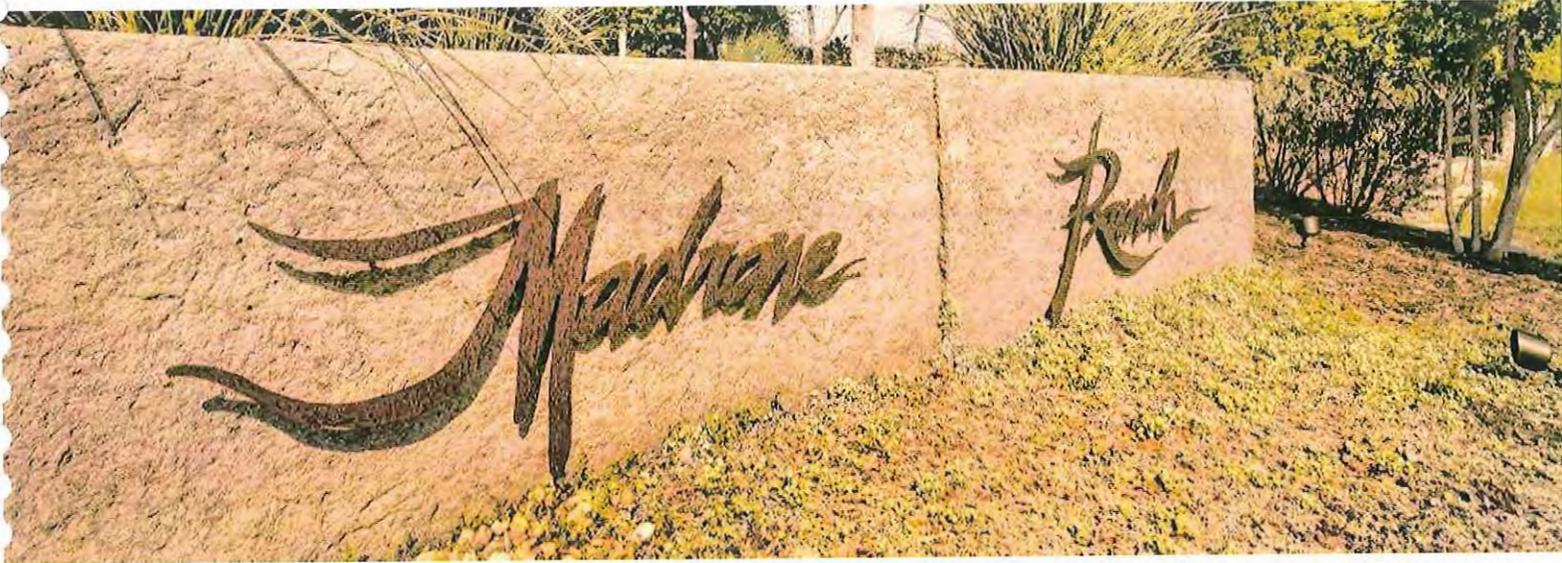

Features

- Burst reports and send separate elements to any output feature
- Quickly notify users via email of success or failure of IGOP jobs
- Option to use third-party solutions

Integrations

- Accounts Payable
- Payroll
- Purchase Orders
- Utility Billing
- Business License
- Accounts Receivable
- Tyler Content Manager
- Laserfiche®

Utility Billing

Work Order System

Maintain a record of labor hours, material costs, and equipment usages, as well as a general ledger of transactions for interdepartmental charges, with Incode Work Orders.

Manage Work Orders

Initiate work orders using custom estimates and templates, tailoring the creation of work orders to your approval workflow process.

Create Work Orders

- Create and approve/reject work requests
- Initiate work order
- Calculate overhead as a flat rate or percentage of costs
- Create charges among departments with effortless interdepartmental setup
- Automatically track usage and create work orders based on hours or mileage

Track Work Orders

- View assigned work orders in a calendar display
- Track equipment used for work orders and display information, maintenance history, and usage

Integrations

- Accounts Payable
- Fixed Assets
- Project Accounting
- Inventory
- General Ledger

Utility Billing

Effortlessly facilitate metered and non-metered billing, maintain contact and property records in one place, and keep track of Utility accounts with Tyler's Utility Billing application.

Manage Billing

Current customers use our system to bill for electricity, gas, and water metered services as well as non-metered services, such as solid waste and miscellaneous services.

Bill and Notice Forms

- Use customized rate tables, including support for tiered billing and demand ratchets
- Generate past-due reminders and cutoff notices
- Use with Microsoft® Office for letter generation and data analysis
- Support bill presentation and third-party bill printing

Custom Billing Options

- Process bad debts, write-offs, and tax liens
- Process full, partial, and pre-payments
- Easily process billing pro-ration, penalties, cutoffs, and payment arrangements
- Support multiple billing cycles each month
- Bill stepped, graduated, and demand metered services intra-cycle

Customer Settings

- Customers can pay utility bills online using major credit cards
- Bill individually or consolidate accounts into a single statement
- Turn on/off individual meter and non-metered services at specific pro-rated intervals

Simplify Meter Tracking

Track meter reading uploads and downloads, transfer dates and times, and route information status with a detailed, user-friendly handheld meter-reading interface.*

- Track meter data at each location with a meter inventory tracking functionality
- Record history of all meters installed at a service address, including installation and removal, serial number, and last reading
- Show separate meter readings and total consumption on one bill when changing meters out

* Requires an annual maintenance fee to support any necessary modifications and maintenance.

Access Information and Reports

View detailed information on customer statistics, service revenue and consumption, taxes, aging analysis, usage analysis, service order statistics, and bad debt.

- Implement rate analysis tools to analyze the effects of changes to rate structure
- Assign flexible security options to allow access to certain individuals
- Capture multiple user-defined data elements using comment codes
- Keep multi-year unlimited transaction and consumption history
- Use multiple search paths to easily locate premise, customer, meter, and device
- Transfer account information and balance to new account when appropriate

Integrations

- Utility Billing Online

Utility Billing Online

Provide detailed information to account holders in a secured section with Secured Access. Once an account holder logs into the secured section they can view financial information, address information, transaction information, and consumption information.

Easily Set Up and Access

Communicate easily and securely with WTCPUA customers, secure transaction histories, and automatically manage system functions with an easy-to-interface program.

Communication Abilities

- Set up automated email responses to requests
- Optionally add an information/account change or disconnect request function
- Optionally add a service request function

Transaction History

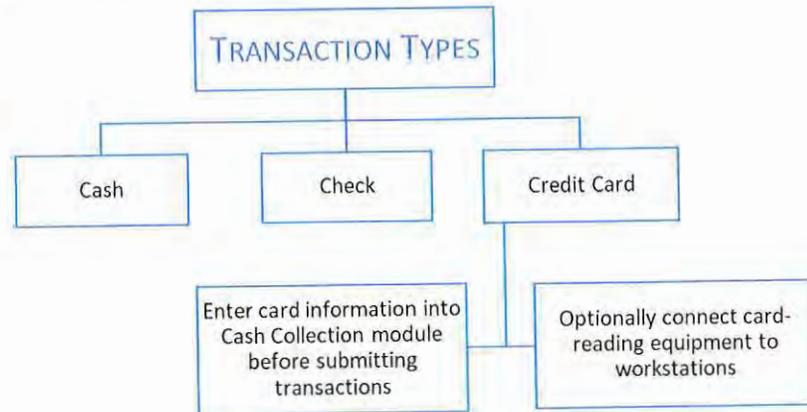

- Generate transaction history
- View last payment date, payment amount, and bill due date
- Review payment arrangements available on file
- Access contracts on file and status
- IT Friendly Set-Up
- Use an interface with a Secure Socket Layer (SSL)
- Send customers to the Utility Billing Online section hosted by Tyler with a simple link

Integrations

- Utility Billing Online

Centralized Cash Collections

Add a fully-equipped cashiering workstation with a receipt printer, automated cash drawer, and optional barcode scanner with Tyler's Incode Central Cash Collections. This seamless and uniform interface works with any type of payment received.

Efficient Transactions

Accommodate efficient transactions using credit card and bar code scanning and validation, a simple point-and-click interface that works with multiple merchant accounts, and automatic posting of transactions from all integrated systems with one click. You can also implement the following to ensure quick and easy transactions:

- Provide online account number validation for integrated sub-systems
- Allow for product and/or transaction-based receipting
- Process payments for multiple accounts across all integrated applications on a single receipt
- Automatically print endorsement of checks
- Default automatically to current balance owed and allows override
- Reinstate cut-off accounts and remove past-due status
- Accommodates multiple merchant accounts for online credit card processing

- Process transactions efficiently with specialized “mail processing” module
- Transmit support requests by email or fax directly from application

Create and View Reports

Easily create or view reports, post payments not associated with accounts directly to the General Ledger, and quickly open and close batches and view batch information for any selected operator, among other functions.

Report Creation

- Facilitate bank account balancing using reconciliation groups
- Produce on-demand management reports
- Save format settings as custom reporting profiles
- Print and void receipts from Operator Process window
- Transmit support requests by email or fax directly from application

Report Lookup and Viewing

- Look up and validate account names and numbers at workstations
- Make real-time inquiries on system, operator, and terminal statuses
- Generate a summary of all receipts processed at any time

Integrations

- Customer Relationship Management
- Utility CIS
- Court Case Management
- General Ledger
- Cash Drawer Hardware

Interactive Voice Response

Keep WTCPUA's utility billing office from being overwhelmed by calls from customers checking the status of their account or making a payment using Interactive Voice Response (IVR). With this system, customers can conduct their business by phone, enhancing customer service and increasing staff efficiency.

Benefits of Utility Billing IVR

- Reduce lobby lines and customer wait times
- Increase access to customer information
- Boost staff efficiency by decreasing customer service calls
- Improve customer response times and increase collections
- Access current account information by integrating with Incode Cashiering or Cash Collections

Mobile Service Orders

Using this mobile application, field technicians can conveniently access service order information and interact with Utility Billing on-the-go using an iPad® or iPad Mini™. Stay efficient and organized by eliminating the need for expensive third-party mobile products.

Work Faster

- Set up and train new users easily
- Reduce travel time for field technicians

- Improve communication between team members
- Initiate, view, assign, modify, complete, and void service orders without being in the office

Features and Functionality

The Mobile Service Orders application is not just for field technicians. Field supervisors, customer service representatives, and billing clerks can all take advantage of its robust functionality.

- View and pinpoint open service orders on the map
- View service orders by the assigned group or individual
- Receive new service orders automatically in the field
- Assign new service orders to a group or person
- Search service orders using the map, service address or service order number
- View relevant contact and service address information
- View service order notes and instructions
- Complete service orders in the field
- Enter meter information, readings and field notes

Integration

- Utility Billing

ITEM B

FOURTH AMENDMENT TO
WHOLESALE WATER SUPPLY AGREEMENT BETWEEN
LOWER COLORADO RIVER AUTHORITY AND
THE CITY OF DRIPPING SPRINGS
(Driftwood Creek Tract Service Property - Commercial Amendment)

This Fourth Amendment to the Wholesale Water Supply Agreement Between Lower Colorado River Authority and The City of Dripping Springs (“Fourth Amendment”) is by and among City of Dripping Springs, a Type A General Law City located in Hays County, Texas ("City"), and the West Travis County Public Utility Agency (“WTCPUA”) a political subdivision of the state of Texas formed in accordance with Chapter 572 of the Local Government Code.

RECITALS:

- A. The Lower Colorado River Authority (“LCRA”) and the City negotiated and executed the Wholesale Water Supply Agreement Between Lower Colorado River Authority and The City of Dripping Springs with an effective date of March 11, 2003, as amended January 21, 2016 (“First Amendment”), May 18, 2017 (“Second Amendment”) and as amended by the Third Amendment on February 19, 2019 (the "Agreement”).
- B. The WTCPUA assumed the rights and obligations of the LCRA set-forth in the Agreement effective March 19, 2012.
- C. The City recognizes and accepts the WTCPUA as having been assigned the rights and obligations of the LCRA set-forth in the Agreement.
- D. Consistent with the West Travis County Public Utility Agency Regional Water and Wastewater Systems Schedule for Rates, Fees, Charges and Terms and Conditions of Water and Wastewater Services (“WTCPUA Rate Tariff”) and service rules and policies, the WTCPUA entered into a renewed commitment letter with Driftwood Investments, Inc. for the reservation of capacity for the Driftwood Creek Tract Service Property – Commercial, identified in the attached **Fourth Amendment Exhibit A** and defined in Section 1.1 of this Fourth Amendment, for 26 Living Unit Equivalents (“LUEs”) of water service. Originally, the WTCPUA contemplated providing retail water service directly to the Driftwood Creek Tract Service Property - Commercial, but the Parties are in agreement that the WTCPUA will provide wholesale water service to the City for the Driftwood Creek Tract Service Property - Commercial, and that the City will be the retail potable water utility service provider.
- E. Driftwood Creek Tract Service Property - Commercial is in the City’s Potential Service Area (as defined in the Agreement).
- F. The City has been issued water Certificate of Convenience (“CCN”) No. 13030 to provide retail potable water utility service in certain areas.
- G. The Parties now wish to enter into this Fourth Amendment to confirm that the City shall be the retail potable water utility service provider to the Driftwood Creek Tract Service

Property - Commercial and the WTCPUA shall provide Wholesale Water Supply to the City for the Driftwood Creek Tract Service Property - Commercial, and to provide other clarifications as set forth herein.

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, including the agreements set forth below, the City and WTCPUA agree as follows:

**ARTICLE 1
AMENDMENTS**

1.1 **Section 1.01.** Section 1.01 of the Agreement is hereby amended to add the following definitions:

“Driftwood Creek Tract Service Property - Commercial” or the “Property” means the two tracts of land in Hays County more specifically described at the **Fourth Amendment Exhibit B**, attached hereto.

“Parties” means the City and the WTCPUA.

“Max Day Reservation – Driftwood Creek Tract Service Property-Commercial” means the maximum amount of water to be delivered to the City for the Driftwood Creek Tract Service Property-Commercial on a daily basis based on the flow rates and capacity commitments established in this Fourth Amendment. The City’s Max Day Reservation for the Driftwood Creek Tract Service Property-Commercial is 900 gallons per day per LUE.

1.2 **Addition of Article X.** The Agreement is hereby amended to add the following Article X:

**ARTICLE X
SPECIAL PROVISIONS APPLYING TO
DRIFTWOOD CREEK TRACT SERVICE PROPERTY-
COMMERCIAL**

Section 10.01. Driftwood Creek Tract Service Property - Commercial. This Article X affects and applies only to the Driftwood Creek Tract Service Property - Commercial and it is not intended to nor should be it construed to affect any other portion of the City’s Potential Service Area or the WTCPUA Service Area.

Section 10.02. CCN Authorization for Driftwood Creek Tract Service Property - Commercial.

Section 5.03 is modified to add the following:

The City may provide retail potable water utility service to the Driftwood Creek Tract Service Property – Commercial pursuant to the Fourth Amendment even though the Property is outside the current CCN of the City. The City may pursue an amendment to its CCN to serve the Driftwood Creek Tract Service Property – Commercial after the information to apply for the amendment is available. The WTCPUA will support the application of the City to amend its CCN to provide retail potable water utility service to the Driftwood Creek Tract Service Property-Commercial.

Section 10.03. Supply of Water to Driftwood Creek Tract Service Property-Commercial. The Parties agree that pursuant to Section 3.01 of the Agreement, except as provided in Section 10.02 of this Article, the WTCPUA shall provide Wholesale Water Supply to the City for the Driftwood Creek Tract Service Property-Commercial in the amount not to exceed 26 LUEs as measured at the Delivery Point. The Parties agree that pursuant to Section 3.01 of the Agreement, the City shall provide retail potable water utility service for the Driftwood Creek Tract Service Property-Commercial in the amount of 26 LUEs.

For purposes of this Agreement, the average daily water use within the Property, as measured at the Delivery Point, shall not exceed 450 gallons per day per LUE or a total of 11,700 gallons per day (i.e., 4,270,500 gallons per year) for 26 LUEs, computed as a daily average over a calendar year. In the event the total annual quantity of water as measured at the Point of Delivery exceeds 4,270,500 gallons, the WTCPUA may assess and the City agrees to pay a water surcharge for water used that is in excess of 4,270,500 gallons.

In addition, the maximum or peak day water use for the Property, as measured at the Delivery Point, shall not exceed 900 gallons per day per LUE, or 23,400 gallons per day. In the event the City's maximum or peak day water use on any given day exceeds 23,400 gallons over any 24-hour day, the WTCPUA may:

1. Install, at the City's sole cost, a water rate flow controller to restrict or limit the maximum flow to the Property to a maximum of 16.25 gpm on an instantaneous basis; and/or
2. Assess a surcharge for any quantity used in excess for 23,400 gallons per day.

Finally, the City understands and agrees the WTCPUA does not and is not required to provide fire flows to the Property. As such, the City is solely responsible for the installation and maintenance any water improvements necessary to provide fire flows to the Property. Such improvements, if installed, shall be located on the City's side of the Delivery Point.

Section 10.04 The City agrees to ensure that all water infrastructure to provide service pursuant to this Fourth Amendment will be designed, constructed and inspected according to WTCPUA Standard Specifications and Rules and Policies, including water quality requirements outlined in the "Memorandum of Understanding" between the LCRA and the United States Fish and Wildlife Service (USFWS), dated May 24, 2000 (MOU) and the "Settlement Agreement and Stipulation of Dismissal" from the lawsuit, Hays County Water Planning Partnership, et. al. vs. Lt. General Robert B. Flowers, U.S. Army Corps of Engineers, Thomas E. White, Secretary of the Army, Gale Norton, Secretary of the Department of the Interior, and the Lower Colorado River authority, W.D. Tex. 2002 (No. AOOCA 826SS) (Settlement Agreement). The City also agrees that such facilities will be

properly conveyed to the City and contained in public rights of way, easements in final plats, or separate easements granted to the City to facilitate maintenance, repair, and improvement of the facilities. The City shall be responsible for maintenance and repairs of all the facilities constructed in the Driftwood Creek Tract Service Property-Commercial.

The City shall be responsible for design and construction of the Delivery Point facilities, including Master Meter and appurtenances. The Master Meter shall meet WTCPUA specifications and be set after WTCPUA approval. The WTCPUA shall own and maintain the facilities, including calibration of the Master Meter. The City agrees that the Delivery Point facilities will be properly conveyed to the WTCPUA and contained in public rights of way, easements in final plats, or separate easements granted to the WTCPUA to facilitate maintenance, repair, and improvement of the facilities. The WTCPUA shall read the Master Meter monthly and bill the City pursuant to the Rates and Charges outlined in Section 10.05 below.

Section 10.05. Rates and Charges.

(a) The Base Fee to be paid by the City to the PUA for the Driftwood Creek Tract Service Property-Commercial shall be determined by the following formula:

{Annual Allocated Debt Service Payment + (25% times coverage * Annual Allocated Debt Service Payment) – (Effective Impact Fee Credit * Annual Debt Service Payment) / 12 months}.

(b) The Driftwood Creek Tract Service Property – Commercial Volume Charge shall recover the PUA’s expenses associated with operating and maintaining the Regional Facilities, including a systems raw water loss fee per thousand gallons to be calculated as follows:

[LCRA Raw Water cost per Thousand Gallons/(1-.10 water loss)]/10

Upon the effective date of this Fourth Amendment, the initial Base Fee for the Driftwood Creek Tract Service Property-Commercial will be \$ 505.85 per year, or \$ 42.15 per month. The Base Fee shall be assessed by the PUA on a monthly basis. Upon the effective date of this Fourth Amendment, the initial monthly Volume Charge will be \$1.83 per thousand gallons used.

The PUA shall utilize the base-extra capacity methodology performed by a qualified professional to determine the appropriate Base Fee and Volume Charge for each wholesale customer, including the Driftwood Creek Tract Service Property-Commercial, and may be adjusted from time to time by the PUA’s Board of Directors.

The absorption (i.e., build-out) schedule used as part of the Base Fee calculation for the Driftwood Creek Tract Service Property – Commercial is ten (10) years. The City shall pay the Driftwood Creek Tract Service Property - Commercial Base Fee regardless of whether the Driftwood Creek Tract Service Property-Commercial meets the absorption schedule used to develop the annual debt payment schedule.

The Effective Impact Fee Credit shall be determined based upon the following formula:

Project Costs Recovered by Impact Fees / Total Project Costs

Project Costs Recovered by Impact Fees shall be determined by the following formula:

Project costs eligible for impact fee recovery as determined by the PUA's most recent impact fee study * the percent level of impact fees adopted by the PUA Board of Directors.

The Annual Allocated Debt Service Payment for the Driftwood Creek Tract Service Property-Commercial, from time to time due and payable, shall be based on the City's allocated pro-rata share of the PUA's capital costs for the Regional Facilities (including interest expense) as determined based on input from the City prior to the issuance of bonds to fund the Regional Facilities so long as the total capital cost allocated to the City is recovered within the life of the bonds, including interest expense. The City's pro-rata share of the WTCPUA's capital costs for the Driftwood Creek Tract Service Property-Commercial is calculated based on its Max Day Reservation, multiplied by the WTCPUA's Cost per Gallon of the Regional Facilities. **Exhibit C-4** attached hereto and incorporated herein for all purposes, sets forth the current schedule of the Annual Allocated Debt Service Payment. **Exhibit C-4** may be amended from time to time by the WTCPUA to reflect future LCRA installment payments as well as future debt issuances associated with future Regional Facility projects.

The WTCPUA's Cost per Gallon of the Regional Facilities, further classified as "System-Wide" Facilities shall be calculated by dividing the total cost of the System Wide Regional Facilities by 27,000,000 gallons. The WTCPUA's Cost per Gallon of the Regional Facilities, further classified as "Hwy 71" shall be calculated by dividing the total cost of the Hwy 71 Regional Facilities by 14,829,230 gallons. The WTCPUA's Cost per Gallon of the Regional Facilities, further classified as "US 290" shall be calculated by dividing the total cost of the US 290 Regional Facilities by 12,170,770.

The WTCPUA shall not allocate costs for future Regional Facilities to the City beyond 27 million gallons per day (MGD) of water treatment plant capacity if the City establishes to the WTCPUA's satisfaction that it has reached eighty percent (80%) of its projected absorption schedule of the Driftwood Creek Tract Service Property-Commercial six months prior to the WTCPUA's issuance of bonds for such expansion.

(b) Within ten business days of a written request from the WTCPUA, the City shall provide the WTCPUA with copies of the City's monthly operating reports indicating the City's peak day consumption, including a break-out of the Driftwood Creek Tract Service Property-Commercial. At any time, the WTCPUA may also install, at its sole discretion, a max-day meter and/or a flow regulator on the City System, including the Driftwood Creek Tract Service Property-Commercial, to assess or control actual maximum daily demands by the City.

If the WTCPUA determines that the City is exceeding the Max Day Reservation for the City or Driftwood Creek Tract Service Property-Commercial, the City will be subject to a surcharge as determined by the WTCPUA Rate Tariff and all service rules and policies.

**ARTICLE 2
RATIFICATION**

- 2.1 By entering into this Fourth Amendment, the Parties hereby ratify the Agreement, and affirm and agree that it is in full force and effect, as amended.

**ARTICLE 3
MISCELLANEOUS**

- 3.1 Incorporation; Definitions. The background as set forth in the recitals is true and correct, forms a material part of this Fourth Amendment and is hereby incorporated into this Agreement. Words with initial capital letters that are used but not defined in this Fourth Amendment shall have the meanings given to them in the Agreement.
- 3.2 Effective Date of Fourth Amendment. The Effective Date of this Fourth Amendment is the latest occurring signature of the City or the WTCPUA.
- 3.3 Counterparts. This Fourth Amendment may be executed in multiple counterparts, each to be considered an original, to be effective upon execution by all Parties.

IN WITNESS THEREOF, the Parties hereto, acting under the requisite authority, have caused this Fourth Amendment to be duly executed to be effective as of the Effective Date as provided above.

Building B, Suite 110
Bee Cave, Texas 78738

Re: Wastewater Solids Management Master Plan

President Roberts and Board:

Per your direction at the February regular meeting of the Board, attached for your consideration is a proposal from Murfee Engineering Company to provide engineering services associated with the above-referenced project. Sludge hauling and disposal is a significant portion of the WTCPUA operating budget. Wastewater sludge disposal alone is budgeted at \$759,700 for FYE19, or nearly half (48%) of the total wastewater department annual expenses. In addition to being a significant economic burden, sludge hauling is the process with the highest profile with regard to effect on the Lake Pointe neighborhood that surrounds the Lake Pointe WWTP through the truck traffic it creates. Additionally, though WTCPUA operations staff does manage the sludge effectively, the current process for sludge handling carries risks of odor excursions. Acknowledgement of the costs and high profile of sludge handling is not new—the WTCPUA has explored some sludge treatment and handling options, both informally and via formal study, albeit in somewhat disjointed parts. Our recommendation, and the purpose of the attached proposal, is to bring a comprehensive master plan to the solids management problem in order to examine the options, analyze and recommend a phased course of action, and forecast expenditures and schedules for the various components of the execution. The intent is to bring planning-level perspective of the system as a whole to the table to inform recommendations that include consideration of economic, operations, CIP integration, and public relations factors.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Dennis Lozano', is written over a blue circular stamp or seal.

Dennis Lozano

Date: May 3rd, 2019

MEC Project No.: 11051.

WTCPUA Work Order No.: _____

Project Name/Location: Wastewater Solids Management Master Plan

Scope/Intent and Extent of Services: Engineering Services shall be inclusive as necessary to assist the Client with development of a wastewater solids management master plan (the Project). Services shall include analysis of the solids generation at both wastewater treatment plants to quantify the existing and projected inputs to the solids management system, development of a conceptual master plan and preliminary engineering of the various elements including alternatives analysis. Comparison of alternatives for each element based on a matrix developed in coordination with WTCPUA operations and management staff. The elements of the master plan will be: thickening, solids transportation, dewatering, and product handling. The preliminary approach is to:

1. Pilot in-basin thickening technology at the Lake Pointe WWTP to evaluate performance as well as realize the short-term economic and public impact benefits of reduced traffic of haul trucks.

MEC will provide a detailed memo report discussing the purpose of the pilot project, a review of manufacturers and systems considered, a breakdown of costs for the study, and a final recommendation to the WTCPUA. The memo will include development of a sampling protocol, a scope of what is provided by the manufacturer, and identification of any items that will need to be provided by the WTCPUA as part of the pilot study. Once directed to move forward by the WTCPUA, MEC will facilitate the pilot study and coordinate between the selected thickening unit manufacturer and WTCPUA staff. MEC will include in the solids management master plan engineering report documentation of the installation and operation of the thickening unit throughout the pilot study together with an analysis of the results. The report will also discuss operational considerations, potential hauling reductions, and cost-savings as a result of the return-on-investment analysis.

2. Perform a preliminary engineering analysis on a pumping system (pump station and force main) which would transport solids, either thickened or raw, from Lake Pointe WWTP to Bohls WWTP for haul and/or processing.

MEC will evaluate and discuss alternative alignments for a proposed solids transport force main and evaluate the associated pumping design points. A focused ROI will examine transportation costs against the capital and O&M costs of the proposed pumping system for evaluation against soft factors including reduced odor generation potential and truck traffic to the Lake Pointe WWTP. Perform preliminary engineering

analysis on dewatering technology for the Bohls WWTP to evaluate system capacity vis a vis existing and projected future needs.

3. Perform a phasing analysis for the elements of the master plan to determine a prudent execution schedule.
4. Prepare cost estimates for the recommended elements of the plan.

Fee Arrangement: Engineering service fees are proposed on a time and materials (T&M) basis, per the attached Hourly Rate Schedule, with estimated amounts as follows:

Pilot Study	\$ 26,680
Solids Pumping Preliminary Engineering	\$ 38,215
Phasing Analysis & Plan	\$ 16,625
Financial Analysis	\$ 12,800
Report Generation	\$ 34,915
Outside Services	\$ 11,500
	<hr/>
	\$140,735

Estimated fee will not be exceeded without prior approval of Client. If Client stops project for any reason, Client will be billed to the date project was stopped on a T&M basis. All reimbursable expenses and outside services will be invoiced per the attached Hourly Rate Schedule.

Terms and Conditions: The approved Terms and Conditional form part of this Agreement.

Special Conditions: MEC has attempted to be as thorough as possible in the preparation of this proposal; however, there may be unforeseen items not included in the above-described work which will need to be addressed. If necessary, MEC will perform such additional items (as authorized) on an hourly basis in conformance with the attached Hourly Rate Schedule. Some additional services which are beyond the scope of this proposal and would be performed by others include environmental studies, construction materials testing, and protective coatings inspections.

Re: US290 System CIP – Sawyer Ranch 1340 Conversion

President Roberts and Board:

The overall pressure plane optimization and conversion for the US290 System is a group of CIP projects that provide for additional capacity (growth) through a number of strategies, which include construction of new CIP projects, repurposing of existing infrastructure, and optimization of service areas by pressure plane. The projects include:

- 1340 Elevated Storage Tank
- 1340 Transmission Main
- 1340 Pump Station
- 1240 Transmission Main
- 1240 Conversion at the County Line Pump Station

Additional benefits of these CIP projects include: reduced customer service problems associated with high service pressures, reduced operation and maintenance costs associated with the reliance on many pressure reducing valves, increased reliability of service through provision of elevated storage as opposed to the use of standpipes, and energy efficiency captured by matching natural topography with pressure plane hydraulic grade line (HGL) more strategically. The proposed pressure plane map (attached for your reference), first developed in 2012, established a picture of the destination that the last few years of project phase implementation have moved the WTCPUA closer to with each milestone.

One question left open in years past and which needed input from WTCPUA operations personnel, was which strategy to use for service to the Vistas at Sawyer Ranch subdivision located on the west side of Sawyer Ranch Road just south of the commercial tracts that front on US290 (located in Planning Unit 393 on the attached map). The area is shown on the map to be in the 1340 Pressure Plane owing to the configuration of existing infrastructure; however, service to the subdivision using 1340 HGL pressure would result in a significant impact to existing customer service pressure experience as well as provide only marginal pressure. As a result, it was determined years ago that use of a higher pressure plane for service to the subdivision was required. An existing but long decommissioned hydropneumatic pump station, owned by the WTCPUA and located on the northern end of the subdivision, was one alternative evaluated for elevating the service pressure within the boundaries of the subdivision. The other alternative is to provide direct pressure service from the 1420 Pressure Plane via extension of new main

from the existing 1420 Transmission Main adjacent to US290 to the distribution main that provides service to the subdivision. In coordination with WTCPUA staff, it has been determined that the most reliable and cost efficient long-term strategy for provision of service to this subdivision is via direct pressure from the 1420 pressure plane. Direct pressure from elevated storage also has the benefit of greater reliability and protection against contingencies affecting service. The project qualifies for funding with impact fees because it is a part of the 1340 Conversion project and funds have been allocated in the CIP budget for it.

Attached for your consideration is a proposal from MEC to provide the engineering service associated with the proposed waterline extension including design, permitting, and construction administration.

Should you have any questions or need any additional information, please contact me at your convenience.

Sincerely,

MEC Project No.: 11051.134

WTCPUA Work Order No.: _____

Project Name/Location: Sawyer Ranch 1340 Conversion Water Line

Scope/Intent and Extent of Services: Murfee Engineering Company (MEC) proposes to assist the Client with engineering services necessary for the design and construction of the referenced Project, as part of the overall pressure plane optimization and conversion for the US290 System. The Project, which is required in order for the Client to provide a higher efficiency of water service, includes operational modifications and approximately 3,800 of new 8" water line to replace an existing, aging line. The new water line, and operational modifications, will allow for a pressure plane conversion of the Sawyer Ranch development. Also included with the Project is the removal/decommissioning of the existing Sawyer Ranch Pump Station.

Design Phase Services include planning/coordinating with the Client, exhaustive research of existing utilities in the Project vicinity, preparing design plans and technical specifications, and securing approvals and development permits from the State and local agencies having jurisdiction.

Construction Phase Services include contract preparation and administration, advertising and bidding, review of shop drawings and RFIs, requisite preconstruction and jobsite meetings, coordination with testing labs and third-party inspectors, and general construction observation through final completion and acceptance.

Services by subconsultants are considered 'outside' services, and will be paid by MEC on behalf of Client. A land surveying subconsultant will be required on the Project for the production of a design survey. The cost for the design survey is estimated below and will be invoiced as an outside service per the approved Hourly Rate Schedule.

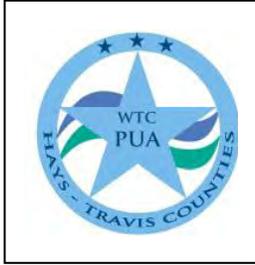

Reimbursable expenses which may be incurred include plan review submittal fees and permit processing, project advertising, plan reproduction and deliveries, and travel/mileage. All such reimbursable expenses are not included in the Design/Construction Phase Services fee estimate, and, if necessary, will be invoiced per the approved Hourly Rate Schedule.

Re: Emergency Interconnection for Water Supply
Travis County WCID No. 18

Dear Mr. Callegari:

In response to your March 12, 2019 correspondence regarding the possibility of an emergency interconnection, our Board of Directors at its April 18, 2019 meeting has approved a feasibility study for an emergency interconnect agreement between Travis County WCID No. 18 (WCID No. 18) and the WTCPUA. WCID No. 18 will be required to pay for all legal and engineering review fees associated with this study, and any agreement that is reached will be for emergency water supply only. WCID No. 18 will also be required to pay for any future design, construction, inspection, engineering and legal fees and all other fees per WTCPUA Tariff and Policies as applicable.

To initiate the feasibility study, we will need WCID No. 18 to pay a deposit of \$10,000 to cover legal fees and \$9,090 for an engineering study per the attached proposal from Murfee Engineering Company, Inc. (MEC). Any legal fees not used will be refunded to WCID No. 18 and legal fees in excess of the deposit will be billed to WCID No. 18. Any additional engineering fees required for the study will be submitted to WCID No. 18 for review and approval before commencement.

Please have an authorized representative sign and date the letter below accepting these terms and conditions and return to us with the required fees at your earliest convenience.

Date: May 10th, 2019 Project No.: _____ WTCPUA Work Order No. _____

Project Name: WTCPUA System Modeling & Analysis in support of the WCID No. 18 Emergency Interconnect SER
Scope/Intent and Extent of Services:

Task 1: Provide engineering support for evaluation of the above-referenced SER for effects on the WTCPUA system. Create a new modeling scenario to represent the requested demand at the proposed delivery point within the context of existing and proposed demands and the WTCPUA Capital Improvements Program (CIP). The scenario will provide the baseline for evaluation of the effects of the demands on the System and development of a preliminary/conceptual facilities plan to meet the demands and mitigate any residual effects in the SH71 System, including WTCPUA wholesale customers. Results will show tank levels, pressure residuals, and water line velocities during peak day, extended period simulations, as necessary to support the recommendations or conclusions in the memorandum. The model results will be presented to the PUA staff for consideration.

Task 2: Prepare a model report memorandum, with GIS mapping exhibits, cost allocation estimates, and model results, for presentation to the PUA Board of directors. This includes multiple planning meetings and discussions.

Fee Arrangement: Time and materials in accordance with the approved rate sheet with an estimated fee as follows and detailed on the attached man-hour allocation:

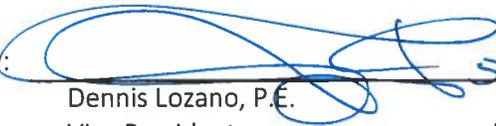

Task 1	\$ 4,025
Task 2	\$ 5,065
<u>Total</u>	<u>\$ 9,090</u>

The estimated fees do not include review fees or direct reimbursable expenses. Additional Services fees must have WTCPUA approval prior to expenditure. The Contract amount for this project shall not exceed the total amount of \$9,090 as listed above without Board approval by the WTCPUA.

Terms and Conditions: The approved Terms and Conditions are a part of this agreement.

VII. STAFF REPORTS

ITEM A

General Manager's Report

May 16, 2019

Personnel Update

- Judith Coker resigned from her position as Senior Engineer on April 22, 2019.
- Trey Cantu resigned from his position as Operations Manager on May 2, 2019.
- Due to staffing vacancies, we are not pursuing the Summer Internship position.
- Joey Sifuentes returned as Line Maintenance Supervisor on May 7, 2019.
- Existing staff is working through these transitions and picking up extra responsibilities to manage the vacancies. A job announcement has been posted for the Engineering position but there has not been favorable responses to date.
- Staff luncheon held on May 1, 2019.

Significant Meeting Updates

- Met with City of Dripping Springs representatives regarding Driftwood Amendments.
- Met with Headwaters MUD representatives regarding additional capacity request.
- Attended monthly progress meeting with RTS Solutions regarding Meter Replacement Project. All meters (2844) replaced. Will coordinate final contract closing process.
- Attended Operational Staff meetings and have had continuous dialogue with Operations Supervisors.
- Attended Bill.com training with Operations Supervisors. Discussed budget, expenses and approval requirements.
- Attended meeting with Directors Walden and Goodwin with individual Operations Supervisors.
- Met with Stefanie Albright and Dennis Lozano regarding engineering projects and contracts.

-
- Met with Jack Creveling regarding CCNG matters.

Noteworthy Events

- On May 1st, Lloyd Gosselink received signatures from LCRA on the Final Closing documents and hand delivered the contract to the PUA office for President Roberts signature. All documents were signed and recorded by Lloyd Gosselink. Special thanks to David Klein and Maris Chambers, Lloyd Gosselink, for their hard work and coordination of all the closing preparation.
- Final payment wired to LCRA on May 1, 2019.
- Lease of the Triton office space expires on May 31st. Staff will empty both suites of all remaining furniture and finalize the terms of the lease agreement.

FY 2020 BUDGET & RATE PLANNING CALENDAR

Updated: 5/10/19

JUNE 15, 2019
Draft rates provided to wholesale customers (must be 60 days prior to Board consideration).
JUNE 20, 2019
Call Public Hearing for Board consideration of rate changes for August 15, 2019
FY20 Budget Work Session with Finance Committee: <ol style="list-style-type: none"> 1 Review of historical expenses. 2 Review of staff proposals for budget adjustments. 3 Review potential impact to customer rates as a result of proposed budget adjustments. 4 Review final rate study and recommendations. 5 Receive Finance Committee direction.
JULY 15, 2019
Publish Public Hearing Notice on Board consideration of rate changes.
JULY 18, 2019
Draft budgets presented to Board for General Operating Fund, Facilities Fund, Rate Stabilization Fund, Debt Service Fund, Impact Fee Fund and Capital Projects Fund.
Draft budget provided to wholesale customers (must be 60 days prior to Board consideration).
AUGUST 15, 2019
Draft budgets presented to Board for General Operating Fund, Facilities Fund, Rate Stabilization Fund, Debt Service Fund, Impact Fee Fund and Capital Projects Fund.
Public Hearing on rate changes.
Board to consider adoption of retail and wholesale rates.
Notice of revised rates to be sent to wholesale customers (must be 30 days prior to effective date).
SEPTEMBER 19, 2019
Board to consider adoption of final budgets for all funds.
OCTOBER 1, 2019
FY20 budgets become effective.
New retail and wholesale rates become effective.

Bee Cave, TX 78738

Re: WTCPUA Project Status Summary – May 2019 – Project Nos. 23008 & 1800076

Dear Jennifer:

Please find the following status report for CP&Y's active projects with West Travis County PUA.

1. Tank & Pump Station Recoating Project (eight locations) – The only remaining work on this project that the contractor (CFG) has left to finish is to recoat the exterior pump piping at the SW Parkway site. They anticipate completing that work in the next week or two and then they will be ready for the final walkthrough with the Engineer and Owner's staff. If all work meets the requirements of the construction documents, a certificate of substantial completion will be issued thereafter. The substantial completion deadline for this project was February 1, 2019. No further payment will be made to the contractor until they achieve substantial completion.
2. Uplands WTP & High Service Pump Station Renovations – Travis Industries is substantially complete on this project and the certificate of substantial completion has been issued. The contractor is currently working on the punch list and is expected to complete all items during the week of May 6, 2019. Project closeout paperwork will be executed thereafter in order to issue final payment.

Thank you and should you have any questions please call me at 254-772-9272 or at swetzel@cpyi.com with written communications.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Scott Wetzel'.

RE: Capital Improvements Plan Projects Update – May 2019

CC: Jennifer Riechers – WTCPUA General Manger

MEC File No.: 11051.131

A written summary of all CIP projects that are currently underway is provided below with a tabular summary following.

Raw Water Line No. 2

Site & NPS plans have been submitted to the City of Bee Cave, TxDOT, and Travis County. Comments from TxDOT have been addressed and resubmittal made. Regular meetings will begin being held with representatives of the Lake Pointe MUD and HOA. The construction schedule has been revised to begin in October of this year owing to delays in easement procurement and the requirements of the USFWS 10(a) permit. The first bid advertisements are anticipated for June of this year.

Wastewater Permit Major Amendment

The Major Amendment Application is currently in technical review. In a recent inquiry into the status of the permit the permit writer indicated that he is preparing the draft permit, indicating that TCEQ internal technical review is likely complete. A request for Board approval of an amendment to the engineering services agreement for additional, unanticipated costs is forthcoming once we have a clearer picture of the administrative path to the permit.

Beneficial Water Recycling Project

The complete source water characterization has been submitted to TCEQ. Development of the pilot protocol is ongoing. The design process is moving ahead and preliminary mechanical drawings have been completed and are under review along with cross-referencing between unit processes and

equipment.

1340 Transmission Main

Pending a walkthrough the work has reached substantial completion. We are working to develop an implementation plan for the project for interim operation until the 1340 EST is online and the system is ready for full implementation of the 1340 conversion (Sawyer Ranch Road service corridor). Restoration efforts have begun and are being coordinated with landowners.

1340 Elevated Storage Tank

Yard piping work and the tie-in to the system have been completed. Substantial completion of the EST will follow the 1340 Transmission Main by a couple of weeks, providing the necessary synchronization to put both facilities in operation together.

Bohls WWTP Expansion Design

The approvals process with the City of Bee Cave and Lake Travis Fire Rescue is ongoing. We are currently working toward Planning and Zoning Commission and City Council approvals. Individual unit processes have been analyzed with only aeration equipment remaining and we have begun detailed mechanical drawings for the individual components of the treatment works.

Southwest Parkway Pump Station Expansion

Coordination with the LCRA and The Nature Conservancy (TNC) is ongoing and we are in the process of securing documentation to provide to the City of Austin that TNC acknowledges and consents to the inclusion of a portion of their property in our site plan application. The property will not be used for construction or included in the limits of construction for any purpose, but will remain an “undisturbed area” in perpetuity. An appraisal for the easement has been procured and provided to TNC as well as a survey description of the property. A conference call to discuss the terms of an easement agreement was held with TNC and a draft agreement provided by them for review.

1080 Transmission Main

Conversations with landowners are ongoing regarding Rights of Entry (RoE). A significant portion of the survey has been completed for that portion of the alignment where RoE is in place. More in-depth subsurface utility information gathering is underway and additional field work and survey is pending resolution of some RoE and easement questions.

West Bee Cave Pump Station Ground Storage Tank No. 2

A recommendation for award is provided under the Consent Agenda.

1240 Conversion at the County Line Pump Station

We have completed review of the available information and determined that the yard piping as constructed is not reflected in any of the records we have access to. For this project and future projects on this site (e.g., 1340 Pump Station Expansion), accurate records and understanding of the yard piping is a prerequisite. We have requested that WTCPUA operations staff conduct potholing on site a locations as directed to gain further information about the yard piping and await completion of that work to move the project forward.

ITEM D

WEST TRAVIS COUNTY PUBLIC UTILITY AGENCY
Regional Water Treatment Plant

Operations Report

May 8, 2019

Operations Overview

Water Plant

Flow is steady at about 7 MGD.
New turbidity monitors installed for Unit 3

Wastewater Plant

Replaced flow meter for Lake Pointe Plant 1

Pump & Motor

Installed new pump control valve for raw water pump 4
Rebuilt pump 1 at County Line PS has been installed.
Rebuilt effluent pump 2 at Lake Point WWTP has been installed.

Line Maintenance

No major repairs to report

Environmental Compliance

There was a permit excursion for average flow at the Bohls WWTP. Adjustments have been made to distribute more flow to Lake Pointe WWTP. Please see the below process control summaries for the Water Treatment Plant and both Wastewater Treatment Plants.

Process Overview of: April, 2019

Water Treatment Plant	Actual
AVG Raw Water	7.120 MGD
AVG Treated Water	6.654 MGD
PEAK Treated Water	8.647 MGD
AVG CFE Turbidity	0.05 NTU
AVG Chlorine	3.24 mg/L

Lake Point WWTP	Actual	Permit Limit
AVG Flow	0.384 MGD	0.675 MGD
MAX Flow	0.653 MGD	
AVG BOD	1.25 mg/l	5 mg/l
AVG Fec.Coli	1.00 mg/l	20 mg/L
AVG NH3	0.05 mg/l	2 mg/L
AVG Turbidity	1.11 mg/l	3 mg/L

Bohls WWTP	Actual	Permit Limit
AVG Flow	0.328 MGD	0.325 MGD
MAX Flow	0.428 MGD	
AVG BOD	2.00 mg/l	5 mg/L
AVG Fec.Coli	1.53 mg/l	20 mg/L
AVG NH3	0.05 mg/l	2 mg/L
AVG Turbidity	2.04 mg/l	3 mg/L

West Travis County Public Utility Agency Billing Summary Report
